Colored Acrylic Powders - Solid Colors

Pozzi blended colored powders were designed for use with our clear monomer. These colors were created for those wanting a more solid color appearance. Designed for use with the salt-and-pepper technique, these colors are sure to catch every teenager's eye! Each color comes in a 4-ounce easy-to-use spray bottle and is available in yellow, white, orange, black, brown, blue, and red.

Colored Acrylic Powders - Glitter Colors

- Acrylic resins can be molded in complex forms with the use of pressure heat.
- They are translucent and biocompatible.
- They do not lose their color or get pigmented over time, are dimensionally stable.
- They are easy to manipulate.
- Available in yellow, green, clear, and hot pink.
